

Winter School of Medical

ONCOLOGY

Plovdiv,
November 9-12, 2017

Dear colleagues,

We are pleased to invite you to the Winter School of Medical Oncology, organized by Young Oncologist Club Bulgaria, which will be held in the period 9-12 November 2017, at Imperial Hotel, Plovdiv.

Our clinically oriented educational program for medical oncologists, radiologists, gastroenterologists, pathologists, and surgeons who wish to improve their skills and knowledge in the treatment of cancer patients will be presented at the event.

The program is focusing on the treatment of the lung cancer, the breast cancer, gastrointestinal cancers, and interventional oncology.

Winter School features plenary sessions on actual problems, as well as offers a look at the latest trends and modern standards. Participants will have the opportunity to attend a workshop for proper understanding and interpretation of publication and research paper data, as well as on coping with difficult situations when working with cancer patients. Participants' attendance is required throughout the training. All lectures will be presented in English.

We hope to have a couple of successful working days and share many new ideas at our upcoming meeting in the cultural capital of Bulgaria.

We are expecting you!
